P.O. Box 4369, Helena, MT 59604 (406) 444-2642

PRIVATE WELL TESTING - ORDER FORM

These screens are not appropriate for Drinking Water compliance purposes as listed under 40 CFR 141. The results are suitable for general knowledge of the quality of your drinking water.

Prices subject to change without notice.

TEST NAME – See back of page for explanation of tests <i>Please read Collection Instructions (separate sheet) before collecting samples!</i>	COST	Check here to Request
BASIC SCREEN Coliform and E. coli bacteria, Nitrate + nitrite, and Specific Conductivity (small 100-mL plastic bottle with tablet for coliform bacteria, and one 250-mL plastic bottle for nitrate and conductivity). Please fill and return <u>both</u> bottles to the laboratory.	\$30.00	
METALS SCREEN includes calcium, magnesium, hardness, sodium, potassium, iron, manganese, copper, and high-level lead and high-level arsenic (one 250-mL plastic bottle or one 1-liter plastic bottle)	\$25.00	
ANION SCREEN includes sulfate, chloride, fluoride, alkalinity and pH (one 250-mL or one 1-liter plastic bottle)	\$25.00	

The following Screens are also available; please call the Environmental Laboratory for more information and bottles.

PETROLEUM SCREEN see back for explanation; MUST BE COLLECTED IN <u>GLASS VIALS</u> OBTAINED FROM THE LAB - PLEASE CALL (406) 444-2642	\$40.00	Please call for bottles
PESTICIDE / HERBICIDE SCREEN see back for explanation; MUST BE COLLECTED IN AMBER <u>GLASS CONTAINER</u> OBTAINED FROM THE LAB – PLEASE CALL (406) 444-2642	\$55.00	Please call for bottles
FULL WELL SCREEN all of the above Screens, at a \$15.00 savings. <i>Please fill and return one 100-mL plastic coliform bacteria bottle; one 1-liter plastic bottle, one set of 3 glass vials, and one amber glass bottle. PLEASE REQUEST THE CORRECT CONTAINERS TO PERFORM THE FULL WELL SCREEN FROM THE ENVIRONMENTAL LAB AT (406) 444-2642</i>	\$160.00	Please call for additional bottles

THE FOLLOWING SAMPLE INFORMATION **MUST BE ENTERED:**

COLLECT DATE: _____

COLLECT TIME: _____ AM PM

COLLECT BY: _____

PHONE NO: _____

Sampling Location: _____

(Kitchen tap, well head, bathroom sink, etc.)

Sample Source: Well Spring Other: _____

Send Report to (Please **PRINT CLEARLY!**)

NAME: _____

ADDRESS: _____

CITY STATE ZIP

PHONE: _____ FAX: _____

Please **INCLUDE A CHECK** for the correct amount payable to DPHHS Environmental Laboratory.
SAMPLES NOT PAID IN ADVANCE WILL NOT BE ANALYZED.

LAB USE ONLY

Date Rec'd: _____ Account #: _____ Check #: _____ Amount Rec'd: _____

LAB #:

EXPLANATION OF TESTS

BASIC SCREEN - Coliform bacteria are naturally present in the environment and are used as an indicator that other, possibly harmful, bacteria may also be present. **E. coli** bacteria is an indication of human or animal fecal contamination. **Nitrate + nitrite** can be naturally occurring, but often is associated with contamination from septic systems, animal corrals or feedlots, or runoff from fertilizers. **Specific conductivity** provides an estimate of the amount of minerals dissolved in the water – high conductivity indicates a large amount of dissolved minerals, which could adversely affect the quality of the water.

METALS SCREEN - includes calcium and magnesium, which contribute to hardness; sodium, which may be of interest to individuals on a sodium-restricted diet; zinc, iron, manganese, copper, and high-level lead and high-level arsenic. High metals concentration can affect the taste of water, may indicate a corrosion problem, or may lead to the clogging of pipes by hardness deposits. Iron concentrations above 0.3 mg/L (milligrams per liter or parts per million) may promote the growth of iron bacteria, which can produce a brown slime (often visible in the toilet tank) and an offensive odor. (Lead and arsenic can be analyzed by a more sensitive method in order to detect lower levels of the metals. EPA has set drinking water limits for lead at 0.015 parts per million (ppm), and for arsenic at 0.050 ppm. The SCREEN test will detect lead to about 0.050 ppm and arsenic to about 0.050 ppm. Individual lead and arsenic tests, which give more reliable quantitation, are available for \$17.25 each.)

ANION SCREEN – includes sulfate (can cause intestinal problems for those not accustomed to drinking water with high sulfate concentration), chloride (high levels can cause water to taste salty, and along with high hardness concentrations, may increase the likelihood of corrosion), fluoride (important for healthy teeth), alkalinity (buffering capacity of the water), and pH (and indication of how acidic or basic the water is)

PETROLEUM SCREEN – detects the presence or absence of hydrocarbons from fuels, oil and solvents in water; use this if you suspect a spill near your water source. Request bottles and collection instructions from the laboratory.

PESTICIDE / HERBICIDE SCREEN– detects the presence or absence of several common herbicides, pesticides and synthetic organic compounds in water. Request bottles and collection instructions from the laboratory.

FULL WELL SCREEN – all of the above Screens, at a \$15.00 savings – **You must collect Petroleum and Pesticide Screen samples in amber bottles obtained from the lab. Please call for these bottles.**

Other Bacterial Tests Available for Well Water

IRON BACTERIA - iron levels above 0.3 mg/L may occasionally support the growth of iron bacteria, which may form a reddish brown or yellow slime that can clog plumbing. These bacteria may cause an odor similar to fuel oil or sewage, or occasionally a “rotten egg” odor. Iron bacteria do not cause health problems, but may make the water less palatable and cause plumbing problems.

SULFUR BACTERIA – may be found in conjunction with iron bacteria, and will impart a strong sulfur or “rotten egg” odor to the water.

Each type of bacteria may be tested in the Laboratory at \$19.00 for iron bacteria and \$19.00 for sulfur bacteria. Call the Lab or your local sanitarian’s office for sampling containers.

PLEASE INCLUDE A CHECK FOR THE CORRECT AMOUNT WITH YOUR SAMPLES. SAMPLES WILL NOT BE ANALYZED UNLESS PAID FOR IN ADVANCE.
